UNCLASSIFIED // FOR OFFICIAL USE ONLY
This Soldiers reference guide provides general Improvised Explosive Device (IED) awareness, possible characteristics and safety information. It will:

Provide a visual depiction of some Improvised Explosive Devices (IED) encountered in support of the Iraq (OIF) and Afghanistan (OEF) theaters.

Provide Soldiers with the basic know how in relation to: “Reacting to a Possible Improvised Explosive Device (IED).

This reference guide does \textit{NOT} supercede any Standing Operating Procedures (SOPs), Orders, or Military Directives.
Preface

The purpose of this guide is to give Commanders, Leaders and Soldiers a training tool representing some of the Improvised Explosive Devices (IED) used in both the Iraq and Afghanistan theaters of operation.

The intent of this guide is to support readiness, unit training, operational planning, and awareness as well as provide information in relation to Reacting to a Possible Improvised Explosive Device (IED) common task 093-401 -5050. Both training and awareness are a proven and effective force protection tool as well as a combat multiplier.

This guide is not all inclusive and should not be used as a sole source of information. Commanders and leaders must remain abreast of current intelligence, tactics, techniques and procedures (TTPs) and local command standing operating procedures (SOPs) available in particular areas of operation in relation to the Improvised Explosive Device threat.

This guide does not cover IED firing / fuzing systems (internal design) or Explosive Ordnance Disposal (EOD) tactics, techniques and procedures. This guide is derived from multiple unclassified source documentation and materials.

The proponent of this Soldiers reference guide is: The Chief of Ordnance, US Army Ordnance Corps, Aberdeen Proving Ground, MD. The custodian of information is the US Army Ordnance Munitions and Electronics Maintenance School (OMEMS), 59th Ordnance Brigade, Explosive Ordnance Disposal Training Department (EODTD). Submit recommendations for changes, updates, deletions, and / or additions to this publication on DA Form 2028 to:

Commander
OMEMS
ATTN: ATSK-TE (Training Division)
Redstone Arsenal, AL 35897-6790

Unless otherwise stated, masculine nouns and pronouns do not refer exclusively to men.
Chapter 1

Background

Improvised Explosive Devices (IEDs) may be constructed out of any available material and contain various fillers to include: explosive, chemical, biological, or hazardous materials. Improvised Explosive Devices may range in size from a cigarette pack or carton to a large vehicle.

The only limitations an enemy bomber faces are: availability of resources, personal ingenuity, and the degree or extent of “know how” required to facilitate construction and in some cases application of an Improvised Explosive Device.

Improvised Explosive Devices are non-standard, and usually fabricated from common materials. The mass quantities of cached, captured enemy ammunition (CEA) and stockpiled munitions within the Iraq and Afghanistan theaters of operation provide the explosive materials to “would be” enemy bombers.

General mitigation measures in relation to the IED threat:

1. Trust your instincts. If something does not seem right it probably isn’t. Be aware of your surroundings (situational awareness).

2. Watch the locals in your area of operation; Are the familiar locals in the area? Are people moving away from you or your element acting or appearing nervous? Most bombers don’t blow up their own neighborhoods.

3. Be aware of news crews in the area for no apparent reason. Most bombers like their work filmed, but do not like pictures of themselves.

4. Before each and every convoy or patrol, brief your personnel on the latest IED threat intelligence. **Brief your personnel each and every time.**
   a. Ascertain what types of items are currently in use?
   b. Known techniques, patterns and likely locations of emplacement?
   c. Where in the area have items previously been placed?
   d. Intelligence on your current route of march (primary and alternates)?

5. Rehearse actions (battle drill) for reacting to a possible Improvised Explosive Device.
6. Wear personal protective equipment (vests, helmets and eye protection). They save lives!

7. Maintain speed and movement whenever possible.

8. Maintain dispersion while conducting either mounted or dismounted operations.

9. Be cautious of choke points, vehicle breakdowns, bridges, one way roads, traffic jams, sharp turns etc…

10. If something stops movement, either mounted or dismounted, survey your immediate area for possible Improvised Explosive Devices.

Reaction upon encountering an item that is deemed a possible Improvised Explosive Device:

**Note**: This reference guide does **NOT** supersede any Standing Operating Procedures (SOPs), Orders, or Military Directives.

1. STOP all movement toward the “Possible Improvised Explosive Device (IED)” and immediately evaluate your surrounding area for possible secondary Improvised Explosive Devices.
   a. Do not approach the “Possible Improvised Explosive Device”
   b. Do not attempt to move the “Possible Improvised Explosive Device”
   c. If possible, avoid using any communication / electronic equipment within the previously established and **SECURE** exclusion area.

2. Establish security:
   a. Establish an area around the “Possible Improvised Explosive Device”. Adjust the exclusion area based on METT-TC, local command policy / guidance, tactics, techniques and procedures and standing operating procedures (SOPs).
   b. Search initial secure area for possible secondary explosive device(s) / hazards, while maintaining security.
c. Identify potential enemy force observation/vantage points.

d. Seek all available manmade or natural frontal and overhead cover.

e. Avoid establishing a “reaction” pattern.

g. Continue mission IAW Higher HQ guidance
WARNING:

Recognition features for IEDs are ever changing based on the enemy's capabilities and available resources.

THESE PHOTOS ARE MEANT ONLY TO SERVE AS A GUIDE!

The following photos and diagrams depict possible techniques and methods of employment for Improvised Explosive Devices.

Former Soviet Union 60mm Mortar with hand grenade fuze

AFGHANISTAN Theater of Operation 3-6
Hand grenade wedged between a rock and a TC-6 anti-tank (AT) landmine

Propane tank with detonating cord attached to two TC-6 anti-tank (AT) landmines

AFGHANISTAN Theater of Operation 3-7
APPENDIX A

React to a “Possible Improvised Explosive Device (IED)”

093-401-5050

Warning:
All soldiers must receive a theater specific IED threat brief to successfully accomplish this task.
Specific identification features for IEDs are ever changing based on the enemy’s capabilities and available resources.

Task: React to a Possible Improvised Explosive Device (IED)

Condition: During military operations you encounter a “Possible Improvised Explosive Device (IED)”.

Standard: Properly establish initial exclusion area, security, and report “Possible Improvised Explosive Device (IED)” to Higher HQ with 100% accuracy.

Danger:
Do not attempt to move the “Possible Improvised Explosive Device (IED)”

Danger:
Do not approach the “Possible Improvised Explosive Device (IED)”

Danger:
If possible, avoid using any communication/electronic equipment within established exclusion area

Appendix A
React to a Possible Improvised Explosive Device (IED)....A-1
Common Task 093-401-5050
Performance Steps

1. Establish minimum initial exclusion area of 300 meters around “Possible Improvised Explosive Device (IED)”.

   Warning:
   Adjust exclusion areas based on METT-TC
   (See Figure 1 & 2 as a Basic Guide)

2. Establish security:
   a. Search secure area for possible secondary explosive device(s)/hazards, while maintaining security.
   b. Identify potential enemy force observation/vantage points.
   c. Seek all available manmade or natural frontal and overhead cover.
   d. Avoid establishing a “reaction” pattern.

3. Forward information to Higher HQ using standard 9-line UXO Report (See Figure 1-6).

Evaluation Preparation: Grade the soldiers as a “go” or “no-go” in each area. Explain the incorrect action for any “no-go”.

Performance Measures (Go – No Go)

1. Upon encountering a “Possible Improvised Explosive Device (IED)”:

Appendix A React to a Possible Improvised Explosive Device (IED)....A-2
Common Task 093-401-5050
a. Ensured all movement towards “Possible Improvised Explosive Device (IED)” stopped.

b. Established initial minimum 300 meter exclusion area.

c. Established security.

2. Submitted standard 9-line UXO Report to Higher HQ.

3. Did not move “Possible Improvised Explosive Device (IED)”.

4. Did not approach “Possible Improvised Explosive Device (IED)”.

5. Did not use any communication or electronic devices within initial exclusion area.

Evaluation Guidance: Tell the soldier that; “Possible Improvised Explosive Device (IED)” are in use in the AOR. Place the Soldier in a scenario that will require them to encounter a “Possible Improvised Explosive Device (IED)”.

Appendix A  React to a Possible Improvised Explosive Device (IED)…A-3
